

CyberPro CP-V200 VGA M/M with ferrites 20m

Description

VGA cables connect PCs, laptops, video cards with projectors, monitors, TVs and other video display systems. VGA native resolution is 640x480 but it can support up to 1080p (digital to analogue transformation), depending on the computer's VGA card and the VGA driver settings. CyberPro equips all VGA cables with fully shield and ferrites for maximum quality.
